	Examiner Jonathan Johnson	Art Unit 1725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Withdrawal of Allowable Subject Matter

The indicated allowability of claim 15 is withdrawn in view of the previously cited art Onuma et al. (5,938,954). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jones (6,060,686) in view of Applicant's Admitted Prior Art (AAPA) and Onuma et al. (5,938,954). Jones teaches irradiating a condensed laser beam generated by a laser source to a certain point of an underwater workpiece (Figure 2, item 18b and 12a); supplying gas to the certain point from a nozzle having a gas exit (Figure 2, Item 22a); the nozzle having an area surround the gas exit that extends to the surface of the workpiece for keeping the supplied gas between the nozzle and the workpiece (Column 3, Lines 25-40) and where the nozzle is formed as a disk having a gas exit at the center thereof having a flat surface area extending in a circumferential direction thereof and (Figure 2, item 20c and Column 3, Lines 25-40). AAPA teaches supplying a welding wire from within the nozzle to the certain point (compare Figure 1, item 8 with Figure 2b, Item 8). Onuma et al. teach a nozzle having a circular groove and protrusions on the surface (Figure 14, items 50

and 44). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the laser of Jones to utilize a welding wire from within the nozzle in order to ensure that the welding wire is provided to the laser spot (see Specification Paragraph 6) and further to modify the combined invention of Jones and AAPA to utilize the nozzle head in order to efficiently remove oxides from the surface of the workpiece (see Onuma et al. col. 15, lines 15-25).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Johnson whose telephone number is 571-272-1177. The examiner can normally be reached on M-Th 7:30 AM-5:30 PM.
